

# PHYSICIAN ASSISTANT – MS-PAS or MPAS

## RECOMMENDATIONS ONLY

Schools Referenced	Des Moines University--Des Moines, IA University of Dubuque – Dubuque, IA University of Iowa--Iowa City, IA University of Nebraska – Lincoln --Lincoln, NE
Notes	<ul style="list-style-type: none"> <li>➤ Completion of a baccalaureate degree is required.</li> <li>➤ The minimum GPA required for application 3.0. <b>2022 U of Iowa avg GPA 3.79</b></li> <li>➤ Graduate Record Exam (GRE) not required for above listed schools</li> <li>➤ Central Application Service for Physician Assistants (CASPA), <a href="http://www.caspaonline.org">www.caspaonline.org</a></li> <li>➤ All grades (repeated courses) will factor into your CASPA GPA</li> <li>➤ Preference maybe be given to candidates who complete all requirements prior to application</li> <li>➤ Search schools by required pre-requisites at <a href="http://paprogramsearch.com">paprogramsearch.com</a></li> </ul>
Biology	<ul style="list-style-type: none"> <li>_____ General Biology: Organismal Diversity--BIOL2051</li> <li>_____ General Biology: Cell Structure and Function--BIOL2052</li> <li>_____ Anatomy &amp; Physiology I--BIOL3101</li> <li>_____ Anatomy &amp; Physiology II--BIOL3102</li> <li>_____ General Microbiology—BIOL3151</li> <li>_____ Genetics –BIOL3140</li> </ul>
Chemistry	<ul style="list-style-type: none"> <li>_____ General Chemistry I--CHEM1110</li> <li>_____ General Chemistry II--CHEM1120</li> <li>_____ Organic Chemistry I--CHEM2210</li> <li>_____ Organic Chemistry II--CHEM2220</li> <li>_____ Organic Chemistry Lab--CHEM2230</li> <li>_____ Biochemistry I--CHEM4510-Must be completed at time of application for Iowa</li> </ul>
Psychology	<ul style="list-style-type: none"> <li>_____ Introduction to Psychology—PSYCH1001</li> <li>_____ Developmental Psychology—PSYCH2202</li> <li>_____ Abnormal Psychology—PSYCH3403</li> </ul>
Statistics	_____ Introduction to Statistical Methods--STATS1772
Medical Terminology	_____ Medical Terminology—PH2160
Suggested Electives	<ul style="list-style-type: none"> <li>_____ Neurobiology—BIOL4116</li> <li>_____ Cell Biology--BIOL4128</li> <li>_____ Immunology—BIOL4150</li> <li>Racial Course: SW 2045 – American Racial &amp; Minoritized Populations</li> <li>_____ Minority Health – PH 3330 – University elective</li> </ul>
Direct Patient Care Experience	Must complete 1000 to 3000 hours of direct patient-care experience; such as C.N.A., EMT, Research, Phlebotomist, Paramedic, Military Corpsmen, for example. University of Iowa 2022 class avg 4,388 hours of direct health-care (not Scribe) experience and 300 hours of research.

## From ExploreHealthCareers.Org

According to *Money* magazine, physician assistant is one of the top 10 best jobs in America. In addition to the demand, the job is attractive because:

- The average length of the program is 27 months.
- The average starting salary is \$94,000.
- It offers the flexibility to move into different areas of medicine without additional education and training.

Physician assistants (PAs) are medical providers who are licensed to diagnose and treat illness and disease and prescribe medication for patients. PAs work in physician offices, hospitals and clinics. Because of their advanced education in general medicine, modeled after physician education, PAs can treat patients with significant autonomy within the physician/PA relationship. In the primary care setting, PAs can provide almost all of the clinical services that physicians provide, including performing physical exams, diagnosing and treating illnesses and prescribing medications.

PAs work together with physicians as part of an integrated medical team. PAs have their own patients and, under a written agreement with a licensed physician, make clinical decisions and provide a broad range of diagnostic, therapeutic, preventive and health maintenance services. The physician-PA team relationship is fundamental to the PA profession and enhances the delivery of high-quality health care.

Every day, thousands of people have access to quality health care because there are PAs in their communities. PAs are critical to increasing access to care for rural and other underserved patients, as they are often the only health providers in these areas. PAs made nearly 300 million patient visits and prescribed or recommended approximately 332 million medications were in 2008.

PAs also work in specialties outside of primary care. The PA profession is designed to be adaptable, preparing PAs to work with physicians in primary care or medical and surgical specialties and sub-specialties, as the need arises.

PAs are focused on patient care and may undertake educational, research and administrative work. Studies show that in a primary care setting, PAs can provide nearly all of the clinical services a physician does, including:

- Taking medical histories
- Performing physical exams
- Ordering and interpreting laboratory tests
- Diagnosing and treating illnesses
- Counseling patients
- Assisting in surgery
- Setting fractures
