

# Have YOU Thought About Science Teaching?

If you have strong science knowledge, have a desire to learn, and love working with others, consider a **UNI Secondary Science Teaching major program!** You have several options including **Comprehensive Science, Middle Level Science, Biology, Chemistry, Earth Science, & Physics Teaching.** Science teaching majors are in **high demand** by school districts inside and outside the state of Iowa with a **minimum starting Iowa salary of \$50,000 and eligibility for the Federal Teach Grant Program!** The UNI Secondary Science teaching programs provide you with the education, experiences and resources to be a successful future science teacher in addition to working with supportive faculty and staff.

## Passion for Science

- Constant **discovery** is always evolving with new research
- Opportunities to **connect science** to real-world issues
- You can **share** your curiosity and excitement about science with others

## Love of Inspiring Others

- You **help** students understand complex ideas in simple, meaningful ways
- **Build relationships** and make a **lasting impact** on students' lives
- **Inspire** the next generation of scientists, doctors, and informed citizens

## Variety, Creativity, & Purpose

- You can **design** engaging lessons and interactive experiences
- Work that feels **meaningful**, interesting, and learning relevant -- **you're shaping both knowledge and critical thinking**
- Opportunities to be able to use science and engineering practices to **answer real life questions and problems**
